

ADB: Asia Clean Energy Forum 2024

Deep Dive Workshop: Energy Transition in Asia through Asia Zero Emission Community (AZEC)

Registration by May 24
USD100 for 2 day Pass

The session aims to show *how various actors, governments, industries and financial institutions, are trying to overcome challenges to achieve decarbonization in Asia*, underlining the importance to promote various efforts and practical pathways towards Carbon Neutrality by considering different national circumstances and to foster cooperation among countries.

ADB: Asia Clean Energy Forum 2024

Deep Dive Workshop: Challenges towards Net-Zero in Asia and the Role of Transition Finance

Registration by May 24
USD100 for 2 day Pass

4:00 pm-5:30pm
5th June (Wed)
@ADB
Headquarters

While transition finance will play a key role in achieving net zero in Asia, financial institutions are facing the complex question,

“what can be considered a fair and orderly transition to simultaneously achieve economic growth, energy security and decarbonization?”

In this session, we highlight how transition finance is used by corporates, referring to their transition technologies, as well as how the financial sector is working on transition finance.
